Sales@WorldProcurement.com

## In the Cloud or On-Premise

Progressive organizations demand solutions that are flexible enough to accommodate dynamically changing business needs.

World Procurement® ERP helps organizations increase efficiency, improve visibility and set the foundation for good governance. Our ERP solutions enable organizations to; manage IT costs, optimize accounting efficiency, streamline order management and procurement processes, eliminate manually-intensive processes, automate time consuming reporting, and improve employee productivity.

### INTEGRATED COLLABORATION

Collaborative and unified solutions for centric process improvement benefits from top to bottom across the entire organization.

Aligns your systems of engagement with your systems of record, enabling you to instantly leverage the latest cloud, social, mobile, vendor and customer facing technologies.

Deeper and more broad visibility yields one-stop resolutions in a proven cloud platform makes it easy to maintain and extend.

## One Solution for All of Your Business Needs

Simple and Intuitive  
Flexible and Configurable  
Integrated and Automatic  
Award Winning Components

## Exploring more cost effective opportunities.

World Procurement's® Enterprise Resource Planning (ERP) solutions provide you with everything you need to establish efficient, integrated processes and gain transparency from all of your business operations.

### Simple and Easy to Use

Our ERP provides your users with a simple, consistent and user-friendly design, which results in greater user satisfaction that leads to higher adoption **without the high cost of training employees.**

### Comprehensive Accounting and Finance

World Procurement's® Accounting and Financial Management solutions **reduces cost by automating, centralizing, and standardizing** transactional processes, even global transactional processes, while managing risk and reducing compliance costs with end-to-end interfacing modules and processes.

### Effective Compliance and Controls

Our ERP solutions helps ensure compliance with various accounting standards & practices and government regulations efficiently with; financial reporting in accordance with multiple accounting standards, pre-built tax filing and reporting tools that are country-specific, customizable roles, audit trail visibility, and more.

### Financial Close Management

Streamline your close processes with capabilities to manage period-end activities, and to detect and respond to problems before they escalate or occur using our Financial Accounting solution which optimizes the financial close by delivering:

- Period locking to prevent incorrect postings to future periods
- Period close checklist of tasks to be completed sequentially
- Financial adjustments for internal and intercompany transactions.
